Data Mining Project Progress Report

1. Have you changed the objective of your project? (Are you addressing a different problem than you originally thought?)

2. What dataset are you using? Have you had any surprises with your dataset (has it been more difficult to understand, visualize, or prepare than you thought?)

3. What challenges have you encountered so far?

4. What have you completed so far? (Please refer to the Assignment)

5. What do you have left to complete?

6. Did you make sure that you understand how your dataset is organized?

   - What is the label (target) attribute?

   - Did you do any initial data exploration? Describe.

7. Briefly describe your plan to complete your analysis of these data.
