

Data Mining Project Presentation

1. Refer back to the Project Assignment.
2. Make sure that you have answered all of the questions and completed all of the requirements.
3. Prepare a presentation to the class summarizing your project. You may want to follow the questions in the Project Assignment. You may want to introduce your project with a short PowerPoint presentation.
4. Prepare a short “walkthrough” of the project in RapidMiner, or, alternatively, incorporate screenshots of your project in your PPT presentation. Be sure to include your data, explaining what it is and what you have done to prepare it, how you decided what kind of model, and so forth.
5. Submit your presentation and any accompanying explanations to Sakai.
6. Submit your project report which briefly recaps your Project Proposal, Progress Report, explains your choice of models, interprets your results, and concludes with any decision recommendations.
7. Each team member must complete and submit the Team Participation Form.
